David Fertitta

Versatile, full-stack web developer with experience abroad working for fast-paced international start-ups, and running Beijing's first English language stand-up comedy club. I've since returned to the US as a highly adaptable self-starter, eager to merge my new passion for frontend web development with my experience in design and marketing to create apps that are as functional and engaging as they are eye-catching.

Experience

2020–2021

NeuroCann in Denver, CO

FRONT END DEVELOPER

- Worked in a React/Typescript environment within an agile dev team to produce a minimum viable product for an ERP software startup.
- Lead the development of numerous UI features, including: login/ frgot password pages, dynamic editable tables, modals and forms.
- Collaborated with designers to bring sleek, responsive design to life using Material UI.
- Wrote informative tests using JEST to expand app test coverage.

2020-2021

TransferThought, in Chicago, IL (Remote)

CONTRACT DEVELOPMENT ASSISTANT

- Worked in a VUE.js environment to fine-tune and beautify various UI featjures for a VR app to prepare app for pitches to potential investors/customers.
- Created demos using in-app functionalities to help attract potential customers.
